MAMMOGRAFIA

ABITUATI A CURARE TE STESSA

BARNAAMIJKA BAARITAANKA KANSARKA NAASHA

BILAASH U AH DUMARKA DA'DOODU
U DHAXAYSO **50 ILAA 74**

Maxaad martiqaad uga heshaa ASL-kaaga?

Si loo xasuusiyo dhammaan haweenka da'doodu u dhaxayso 50 ilaa 69 in hore loo ogaado kansarka naasuhu waa suurto gal ah iyada oo loo marayo fulinta joogtada ah ee raajada bilaashka ah 2dii sanaba mar. Ujeedadu waa Muujinaya joogitaanka xitaa burooyin aad u yaryar, oo aan si kale loo aqoonsan karin, si loo ilaaliyo daacadnimada naaska iyo, marar badan, badbaadinta nolosha.

Xitaa dumarka da'doodu u dhaxayso 45 iyo 49 waxay qaadan karaan raajada bilaashka ah labadii sanaba mar: ma heli doonaan warqad martiqaad ah laakiin waxay waydiisan karaan dhakhtarkooda tixraac gaar ah oo ka reeban. Taa baddalkeeda, haweenka da'doodu u dhaxayso 70 iyo 74 waxay awoodi doonaan inay wacaan lambarka bilaashka ah ee baaritaanka ASL oo ay weydiyaan Si aad u sii waddo haysashada mammogaraamkaaga bilaashka ah iyada oo loo marayo Barnaamijka Baadhitaanka.

Barnaamijka Baaritaanka waxaa lagu bixiyaa lacag la'aan, laga bilaabo naasaha ilaa baaritaannada dabagalka ah iyo daaweyn kasta oo laga yaabo inay lagama maarmaan noqoto.

Haddii aanad waligaa martiqaad ka helin ASL ama aanad waligaa ku biirin barnaamijka, waxaad wici kartaa lambarka U dir lacag la'aan ASL tixraaca si aad u weydiisato ballan.

Waa maxay mammografi?

Mammography waa raajo naasaha, waa baaritaanka ugu gaar ah, ugu xasaasisan uguna waxtarka badan ogaanshaha hore ee kansarka naasaha.

Ma xanuun baa?

Maya, dumarka qaarkood cadaadinta naasaha lagama maarmaanka ah waxay noqon kartaa mid aan raaxo lahayn dhowr daqiiqo.

Ma intixaan halis ah baa?

Maya, raajada dhijitaalka ah ee isticmaala qiyaasaha raajada ee aad u hooseeya ayaa loo isticmaalaa baaritaanka.

Ka dib marka mammogramka la sameeyo?

Haddii ay dhacdo natiijo caadi ah, Xarunta Baarista waxay soo dirtaa isgaarsiinta natiijada si toos ah guriga oo leh warqad laba sano ka dib waxay soo diri martiqaad cusub si ay ugu celiso mammografi. Marka, dhanka kale, baaritaanno kale ayaa sidoo kale loo baahan yahay (tusaale, ultrasound) si loo gaaro ogaanshaha dhabta ah, ASL waxay kula xidhiidhaa qofka telefoon si ay si degdeg ah u habayso ballanta.

Haddii ay dhacdo natiijo aan ficnayn oo baadhista ah, Xarunta Baadhista waxay kula xidhiidhi doontaa qofka telefoon si ay ugu yeedho si loo maro, had iyo jeer lacag la'aan, ultrasound qoto dher. Wixii macluumaad

dheeraad ah e daawaynta xigta, haddi loo baahdo, waxa si toos ah iyo had iyo jeer u bixiya lacag la'aan ASL tixraac.

Ma ku aamini karaa?

Mammograms waxaa si gaar ah u qiimeeya laba khabiir oo shucaac ah oo akhriya kumanaan imtixaan midkiiba sanadka, sida looga baahan yahay talooyinka Yurub.

Dhakhaatiirta shucaaca ee ka shaqeeya Barnaamijyada Baaritaanka waa inay ka qaybqaataan barnaamijyada tababarka sii wad, u heellan dhaqdhaqaaqa naaska ugu yaraan 50% dhaqdhaqaaqooda oo akhri ugu yaraan 5,000 mammograms sanad walba.

Nidaamyada oo dhami waxay raacaan tilmaamaha qaranka iyo Yurub waxaana la mariyaa xakamaynta tayada.
